18:00	END	18:05

ACTION PROTOCOL

Justin Bieber "Baby" looped very loud, James handcuffed on the back, hooded sitting on the floor, Performance starts.

Adjusted the Camera, checked on stream.. Justin is still singing..

checked on James, he is ok. Screamed something not understandable. Did cam adjustment and some photos
Check on James, told him he is not alone (10 Viewers on Livestream), typed some msg into the livestream chat

Hood off, fotos gemacht, very very red head...

Check done, Streaming server RESTARTED

Check done, still Justin Bieber "Baby", camera position corrected, stuff moved away, James was laughing with a superred head

Handcuffs off first, so psychologically he thinks he will have some space and comfort, but then.. We put on the flexicuffs on the feet.

NOTE: BTW, he is always lying on the floor, which is very hard and uncomfy, sitting is also not nice, we decided not to tell James what time it is, so this way he is more vulnerable and this is actual torture, because he doesn't know how long it will take

Done, James desperately wants to piss, but we will go and grab a bite to eat first

Restart done, James still needs to piss, he has to wait another 15 min.., photos taken, videocam reset.. All things fine, told him that we will come back and then he can piss..

Toilet (pissing with camera and no shoes, the floor is full of piss), coming back...

NOTE: ... there are all these huge insects, he starts to kill them one by one, they come in from the door, huge things.. so we give him tape and a croissant and a 1/4 bottle of water, he started to use computer, put a hood on it

Put hood on James, his hands are still not cuffed, so I told him if he takes the hood off we will put the cuffs back on. Torturer-thinkin!

Changed back to "Baby" by Bieber

Restarted Streaming Server, put light out just to put them back on in a while

Bieber still blasting, put him into a real stressposition on a chair, hands behind but he can not get up without taking the chair, white hood, very tight (we had mercy and killed 20 huge bugs)

NOTE: can not scratch his nose, sounds irrelevant, but it is not! Very annoying, and this stressposition can become very uncomfortable after 30 min - 1 hour

checked on James, no news

checked on James, no news

Restart Streaming server

NOTE: To have rules and regulations (even if they are written by yourself) helps massively to be more hard, merciless and pervert...

... You just follow the rules and don't think what you are doing as an interrogator/prison guard, you are not human, you are a machine without consciousness and responsibility.

NOTE: "It is not really getting to me so much" James Powderly. So we turned the sound up... let's see how long it takes until it is unbearable
No check, i can see on cam he is ok

No special happenings, quite some people passing by, visiting james
Spoke with James, he is unsure how many hours passed, some crazy drunk koreans danced around and brought him beer, he said hooding works well, so i hooded him

NOTE: James had short panic when he woke up and sound was loud hood on.. This seems to work
Restarting CAM u Streaming Server done, took some photos, James unmovable, sound extremely loud
Check ok, no news from this front, promo-emails are going out to 3500 email addresses, art, press, culture, theory, writers, going out in the last 2 hours.. Some mailinglists as well..

Checked on James, he is ok, having some troubles to breathe but in general he is ok. I checked the livestream chat, adjusted the camera and went back to work on the promo of the event

NOTE: thinking about how to proceed, i am tired and fucked up myself, gotta sleep, so i can not take responsibility for james being under stress. So how to do?

How much can he take, will it not be enough if we pussh him tomorrow during the day as much as possible.. Restarted stream server

Handcuffs and Hood taken away, Piss-break, then back in, in kneeling stressposition, feet with flexicuffs, handcuffs tightend to flexicuffs so he can only be on knees or lie sideways.. Then also hooded on request ;)

done, ok, did some filming.. Seems to be extremely uncomfortable

Checked on James, asked if ok, he was still doing fine.. So hood up and left..

Checked if James is ok, he is hurting, position is extremely uncomfy, but it is ok.

Food, Water, stream restarted and cam

checked, everything ok

everything roger

new position, stressposition, sleepposition, sound slightly down, temperature up
done, server restarted..

Checked on James, he is sleeping, Server restarted

Checked on James, he is sleeping, Server restarted

Checked on James, server restarted, he is awake, Sound turned up to full volume

Checked on James

Checked on James, Hood up, Sound up, restarted streaming server

Handcuffs off, Hood off, Standing position (can not fix him, so he has to cooperate)

Meowmix exclusive, standing (but watched, everytime he moves he would get hit hard in the back of his legs

standing, hard hitting, screaming, everytime he moves, hood tightened, music loud, visitors coming in standing, hitting.. Then he fell down and couldnt get up, i hit him hard but he wouldnt stand anymore.. So i changed to a different position, sitting, i tried to find the palestinian sitting torture position with broom, couldnt find it

Sitting position, speakers closer so music is louder, tightened the hood with tape, really tight but still so he could fully breathe, poured water over him

hit him when he would move

screamed at him and hit him when he would move

unshackled him, let him go to restroom and talked with him. Also gave him some rotten food and a bit of water

reschackled up in palestinian chair torture position, wonder how long he will take it

israeli chair torture applied, it hurts him very much obviously, a little bit of waterboarding as well, put a bottle of water over his body and his head/hood

more "waterboarding", he screams, it seems to hurt but it is ok, the sound is blasting and i feel fucked and kaputt after torturing. But james is a narcissistic masochistic performer, so he will be fine. He actually enjoys somehow,

NOTES: i hear him screaming even though i wear earplugs and the sound is very very loud

He came down from the standing, as promised before, i beat him up severely, he was still laughing but it also really hurt. I beat him up twice, because the first time the video hd-cam wasnt on record.

Meomix still blasting, he is on his back, hands tight, feet tight, i put the speakers right next to his ears, it is very very loud, i still wear earplugs and you can hear the sound through the whole building

He is lying flat out, eyes closed, speakers as close as possible to his ears full blast, he is relaxing before i take him into the palestinian seating position

It gets to me slowly, it is fucking exhausting and the sound (although my earplugs), so i hope it is over soon! James is sitting there, can not move, hood off, a lot of kids watching

still the same status, a lot of kids around watching, many many kids actually still the same, wonder if i should use some justin bieber for the end...

Justin Bieber blasting, kids happy, hood up, gave him a splash of water into the face when he was relaxing, now i am bored, too many kids, don't wanna torture anymore (never did actually), gotta sit out the time

NOTE: palestinian sitting not really effective on the short run, maybe over a period of some 5-10 hours..

But just for 1-2 hours a bit too lax.. Haha.. I wonder why he is not going nuts about scratching his nose and shit,

HAD To take him out of palestinian sitting position (with broom between hands/legs), it hurt too much and he started screaming for help, now he is getting really sick and fucked up.

NOTE: We agree on stopping around 5pm and doing interview then so we are finishing at 6pm

SERVER RESTARTED, sending off the last mailinglist emails (rohrpost, spectre, rhizome...)

James takes a piss, i leave him on the long leash, he is desperate and kaputt, sick and wet from the water, sleep deprivation, hurt, stressposition, music torture and low nutrition and very little drink

james is sitting in a chair, desperate, looking at performance photos

PART 1 OVER, uncuff unstrapp, flexis gone, let him relax on the seat, the sound goes off for the first time after 24 hours

we are done, james is walking around, getting his senses and feelings together, his dick is blue, dark blue

Interview mit James

Interview mit Hans

FINISHED, WRAPPING UP, TAKING A SHOWER, DEINSTALL ALL TECH SETUP AND GOBACK TO SEOUL ASAP.
